

Fruit drinks manufacturer awards Packaged Feeds contract for liquid residual & full waste management saving them £15k PA

TARGET – Take the client to a ZERO WASTE COST situation

Packaged Feeds Ltd were tasked with looking at the full waste situation with a priority to reduce costs for the complete site.

PFL has worked closely with the client to deliver significant cost reduction in moving away from land injection and delivering a treated solution for juice washings, through either Animal feed or anaerobic digestion off site.

Initiating a waste minimisation and line side segregation project across its entire site, involving an integrated and dedicated PFL manager on site to support short, medium, and long-term waste cost reduction objectives.

Management Information report or “MI” provides the client a concise breakdown of all waste streams and each collection helping site to understand trends and identify key areas of improvement. This will include material rebates ensuring no delay in future commodity payments.
